Identify credible sources and pathways of inrush, preserve engineered separation and containment, and ensure people are withdrawn before an uncontrolled release can reach them.

Document control	Complete before controlled issue
Business and operation	[Business Name] | [Site or operation]
Document owner	[Mine Operator / Site Senior Executive with nominated technical owner]
Application	Mining operations exposed to uncontrolled movement of water, slurry, gas, backfill or other material into an occupied or safety-critical area. Apply principal-hazard requirements where the n≥2/multiple-fatality test is met.
Template status	Version 1.2 draft for review | Prepared 13 October 2026
Adoption approval	[Approver name and position] | [Signature] | [Date]
Review due	[Date] and applicable legal or operational triggers

Using this template

Complete orange bracketed fields, confirm the applicable legal regime, consult affected workers and verify controls in the actual workplace. Unresolved safety critical fields prevent release. A signed document does not by itself establish that risks are controlled.

This template is a starting point only. It must be reviewed and adapted to the actual task, plant, site, workforce, legal obligations and client requirements before use. OH&S Systems Management Australia Pty Ltd accepts no liability for use of this template without appropriate review and adaptation. It is not legal advice.
